

EDCLink provides your website visitors access to potentially thousands of available properties for sale or lease directly on your EDC website. EDCLink, available in three easy to install formats, integrates Catylist's search engine technology and an existing database of available properties listed by commercial professionals in your marketplace.

EDCLINK

HOW IT WORKS

Setup is quick and easy

- We provide your organization with a branded link to available property inventory and commercial professionals in your marketplace via a Catylist local commercial information exchange provider
- We provide a robust search and display engine that is updated in real-time
- You plug-in our database content directly into your website

WHY IT WORKS

Maintenance free, quality data updated in real time

- Add high value content to your website by providing site consultants and real estate decision makers with access to potentially thousands of available properties for sale or lease
- Receive a fully-populated, maintenance free database tied directly to the local commercial brokerage community
- Access leading-edge technology for a fraction of the cost of building your own system
- Retain control and ownership over all other components

GET STARTED TODAY! EDCLink is an efficient and affordable alternative to building and maintaining an in-house database. Contact us at 877.595.5478 or edc@catylist.com for more information.

EDCLINK PLUS

For Economic Development Organizations who also want to market city-owned properties on their website, we offer EDCLink Plus. Same cutting-edge search technology with additional flexibility and control. Features include:

- Showcase your properties via a separate link located on your website
- Add unlimited properties including photos, attachments, links, descriptive detail and password-protected documents
- Create reports and brochures for email and print
- Brand all information with your organization's logo and contact information
- Manage all information from one convenient administrative console

EDCLINK - GIS PLANNING

For those groups using GIS Planning technology, EDCLink properties can be easily integrated into your current application.

- Add listing layer via a direct FTP data feed for a seamless integration
- Maintenance free, quality data updated in real time
- Maintain all functionality of the GIS Planning software
